

## Play "Cinderella"

It was a four month preparation. The English club members decided to choose the Cinderella script for the play. Everybody did their best in the practice and together with each other's talents, skills and effort we were able to produce a magical props, costumes and the student's talents were developed. The most interesting part was when we were able to memorise and pronounce the words properly in English. As a team, we enjoyed each others company. We are so grateful that aside from the experience we won the first prize in Kitatama area and we are excited to join the Tokyo ward competition on December 4<sup>th</sup>. We would like to say thank you for our teachers, and for the parents who helped in collecting the costumes. We are so proud for our effort and looking forward to another win next year.

## Chorus contest

It was a sunny Saturday morning. All the students came early at 8:45 for a practice. We started the program at 10 am. Everybody was both excited and nervous but all the students sang very well. The voices of the students were like angels singing. Everybody was good but there was only one champion. Fortunately everybody got a specific appreciation for the best performances. The winner were 1-5, 2-1 and 3-1. The highlights of the program were when the teachers performed. The program ended with full of joy. It was an amazing day celebrated with the students, parents and grandparents. Looking forward to next years choral contest.

## Farming experience

October 13<sup>th</sup> was a little cloudy but first grade students went to farming experience. It was our first time to visit the farm.

All the groups had to meet up near the farmer's house at 9 a.m. I was excited to try and experience farming. After seeding we harvested cabbages and spinaches. We had tea time at 10 a.m. and we shared sweets and drinks with the farmers. Finally we brought a lot of souvenirs of different kinds of vegetables back to school. We shared different stories about agriculture and our individual experiences during farming. In the afternoon we told to ourselves we will share to other students what we learned from the experience by writing it in the newspaper. Now we appreciate the effort of the farmers so we realized to always eat vegetables cooked by our parents because we know the effort made by the farmers. We love to share our story to everybody in school. We learned about the different ways and lives of the farmers and now we appreciate their hard work.

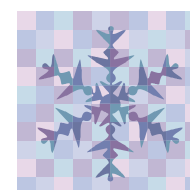

## Editor's postscript

Did you enjoy our news letter?

Second term will end soon. Do you have any plans for the winter holidays?

We hope you will enjoy your winter holidays.

See you next year.

(Kaede, Mihiro)
