The second year students visited high schools

On June 20th, the second year students visited high schools. They learned about high school daily life. High school is busy, compared to junior high school. Some schools are very far from here so students have to use trains every day. But there are a lot of good points. First, there are many nice teachers. Second, high school students are enjoying school life. Third, there are many club activities. Lastly, some high schools have better facilities. For example, some schools have vending machines, a big gym, a nice computer room, large ground and so on.

Second year students had a good experience this day. They will use this experience in the future when they choose a high school to attend.
